7198512	20 m	2mri	1/20

Offering a very fast application of 134 seconds, Paris bandage plaster Gypsona BP is distinguished from its competitors with its special woven leno cloth. Fulfilling all your expectations from a bandage at an optimal level, Gypsona Bp offers comfort of use with its moisture resistance.

It has a wide range of uses from emergency trauma centers to aesthetic operations, where rapid and safe immobilization is required.

The special interlocking weave of the leno fabric makes it difficult for the bandage to disperse, while its contours make it more comfortable around. Leno cloth, which has a very high plaster retention capacity, reinforces its texture by locking the plaster particles between its pores. Plaster particles with a rounded core design help to quickly move moisture out of the gypsum.

MARMOLITA

Parisian bandage plaster
Paris bandage plaster, Marmolita S is a fast-freezing material that results in low plaster loss. It contains a reed cloth woven from cotton yarn and contains calcium sulfate hemihydrate, alpha, beta crystals and adhesives. It provides excellent results with a soft creamy plaster consistency.

FLASHCAST

Fibreglass Synthetic Plastered Bandage

Flash Castrigit is a synthetic plaster that can be preferred in cases where fixation is desired. Thanks to the "polyurethane resin" it contains, it is very light. It also provides user comfort by being water resistant. For plaster techniques; it provides very practical application compared to standard powder plaster and saves application time.

DELTACAST SOFT

(Flexible Solution)

Fiberglass-Free Soft Synthetic Plaster

Designed to provide functional support in fractures and soft tissue injuries. It provides ease of use with its light and breathable (fiberglass-free) special structure. The semi-rigid DeltaCast Soft should be used in cases where partial joint immobilization is desired.

DeltaCast Soft is used in both primary and secondary plaster applications, easily taking the body's indented and protruding shape. It has special filaments for increased shaping ability and consists of a patented polyester substrate that produces less dust during plaster removal. Its special fiberglass-free structure provides a high level of X-ray transmittance and soft edge texture, these edges have the ability to stretch in all directions. DeltaCast Soft Plaster can be removed without the need for a motor and is very easy to apply.

DELTA-LITE PLUS

Fibreglass Synthetic Plastered Bandage

It is produced to provide economic immobilization. It is used in primary and secondary plastering applications where a rigid fixing is required. Delta-Lite Plus is tough, lightweight and moisture resistant. It is an easy-to-use fiberglass plaster bandage. It is made of braided fiberglass impregnated with a patented polyurethane resin that ensures perfect lamination between coats and secure adhesion of the finishing tip, with the ability to work without sticking to the hand. Its structure creates a smooth plaster surface, reducing the risk of the plaster catching on clothing.

UNDERLAY PLASTER

SOFFBAN NATURAL

Synthetic and Natural Orthopedic Support It is an underlay bandage support made of 100% natural cotton. 100% Viscose softness in its structure provides good padding and protection as it adapts to the patient. Hypoallergenic, breathable. Soffban Naturel offers adaptation and application as it can be easily torn and separated. Reduces the risk of weight bearing on the fracture when stopping padding with cotton.

SOFFBAN SYNTHETIC

Synthetic Under Plaster Cotton with Bacteriostatic Effect Triclosan* "No Odor in Plaster"

Soffban Plus has an easier application and a good fit as it can be easily torn off. Containing Triclosan, an effective bacteriostatic and odor-controlling agent, Soffban Plus sets new standards for orthopedic gypsum cottons, while retaining all the existing advantages of a synthetic underlay cotton. For many patients, the odor of plaster is an unpleasant problem associated with the use of plaster. Soffban Plus gives the plaster technician and the patient greater assurance that the highest level of care is being provided and received.

JERSEY HYDROPHOBIC & JERSEY COTTON

Synthetic and Cotton Plaster Stocking Jersey Hydrophobic and Jersey Cotton are stochinets designed to protect the patient's skin under synthetic or natural plaster materials. It minimizes the risk of irritation with its special structures. With its cotton content, it quickly absorbs moisture from your skin and carries it to the surface. Thus, it helps prevent bad odours and itching. Jersey Hydrophobic and Jersey Cotton tubular cytokines can be sterilized by ethylene oxide vapor or gamma ray.

LEUKOSAN STRIP

Real Advantage in Leukosan Strip Wound Closure

Leukosan Strip is a very good alternative to topical skin closures with atraumatic application and removal, low risk of infection and cosmetic results. With its knitted elastic fabric, it easily adapts to many skin textures.

REF	Dimensions
7262903	6 x 100 mm
7262904	12 x 100 mm

LEUKOSAN ADHESIVE

(Ultra-High Viscosity Innovative Closing System)

Skin Adhesive

Leukosan Adhesive is a high viscosity adhesive for fast, safe and painless closure of the wound. Provides high viscosity, maximum control and ease of application.

2-Octyl and n-butyl cyanoacrylate. Ultra-fast drying in 20 seconds is sufficient to achieve a single-layer, strong and secure closure. It can maintain its effectiveness within 9-12 days. It is indicated for tropical closure of wounds such as easy cuts, injuries and surgical incisions.

Thanks to the second applicator inside, it can create an antibacterial barrier with post-closure application.

REF	Description	Box/Case
72541	Skin Glue 0.7ml Tube	1/10

CUTICELL CLASSIC

Specially produced for increased stability when cutting to the desired size is required. It does not fray and has pores that allow exudate passage. Double knot system at each weft-warp point.

CUTIMED CONTROL

Wound Pad Providing Autolytic Debridement

Inaugurating a new era in wound dressings, BSN Medical introduces Cutimed Hydro Control, which can change behavior according to the needs of the wound. Cutimed Hydro Control helps remove fibrin by calling enzymes into the wound with its autolytic debridement feature. With its improved exudate absorbency, it traps the liquid it turns into a hydropolymer into a pad. With its osmotic effect on the wound, it helps to keep the wound moist by drawing the fluid from the surrounding cells to the wound area.

REF	Dimensions
7323100	4,5cm x 4,5cm
7233101	7.5 cm x 7.5 cm
7233102	10 cm x 10 cm
7233103	15 cm x 15 cm

OPSITE SPRAY

Wound Closure Spray

Non-deep cuts Non-deep abrasions
Stitched wounds Vaccination and needle sites Non-exploded water-ball wounds
Spray the wound area upright at a distance of approximately 15 centimeters. If you are applying for the first time, spray several times.

Features; Impervious to water, liquid, sweat, moisture on the wound.

CUTIMED GEL

Wound Cleansing Gel

It has a preservative-free formulation. Cutimed gel reduces the risk of allergies and does not contain preservatives that can be found in other hydrogels. Provides optimum consistency and viscosity
It is easily applied and keeps securely in place until the time of a secondary dressing.

CUTIMED SILTEC

Wound Cleansing Gel

It provides painless and traumatic dressing changes.

With its perforated silicone structure, it gently adapts to the wound contact layer.

It provides ultra-tissue protection.

The evenly perforated silicone layer protects the new, fragile layer of epidermal cells that contribute to wound healing.

It has reliable fluid retention.

The superabsorbent particles on top of the foam not only absorb a significant volume of liquid, but reliably continue to bind exudate even under compression.

Upright suction pad with polyurethane foam and silicone wound contact layer - minimizes the risk of wound skin maceration.

It offers a minimum risk of maceration.

WOUND CLOSURE SPRAY

SCHUTZ

It is also waterproof and allows the skin to breathe and is resistant to friction. It can also be used as a bath band due to its waterproof feature. It is used to protect the wound from water and other liquids by covering the wound in cases where contact with water is inconvenient. It should be applied evenly from a distance of at least 1015 cm.

HOURLY URINE BAG

It has a capacity of 500 ml.
 Scaled collection room.
 Precision scale up to 50 ml.
 It has four compartments and a hydrophilic filter.
 It has a bypass system that prevents overflow.
 Tap that drains all compartments at the same time.
 Adjustable hanger straps.
 2000 ml capacity, foldable T-tap, bottom emptied urine bag.
 Large-diameter, flexure-resistant hose.
 On/off clamp.
 Connection connector.
 Sampling port on connector.

3-WAY TAP

The 3-way tap is used to deliver more than one fluid at the same time. The taps on it have a 360 degree rotation feature. With this feature, it is also useful for directing fluid flow. Thanks to its transparent body, the liquid passing through it is easy to see.

EXTERNAL THERMOPLASTIC NASAL SPLINT (S-M-L)

It can be applied in 60 seconds. It provides stabilization of the nose and reduces the edema that may occur after nasal surgery or trauma. It keeps the nasal bones in the right position.

SERUM SET

Airway inlet with bacterial filter
 Medical grade PVC hose resistant to bending and breaking
 21g needle
 Continuous and regular flow control mechanism

BLOOD BAG

(SINGLE, 2, 3, 4)

For the separation of erythrocytes, platelets and plasma in the fully enclosed system

Capacity: 450 ml

Transfer Bag : 3x300 ml

Anticoagulant : CPDA-1

Donor Needle: 16 G

SCALPEL TIP

Scalpel tips are produced from carbon alloy stainless steel material. Each scalpel tip is packed individually in foil packs.

Scalpel tips are suitable for use in many different surgical interventions. Each tip of the scalpel was sterilized by gamma sterilization method.

10-25 Fr

POLYURETHANE FEEDING CATHETER

It is produced from high-tolerance biocompatible polyurethane material to prevent irritation in the nasopharyngeal area. Allows radiological contrast. It contains an air- and water-resistant cap and a connector compatible with lines and syringes. The anti-clog system prevents clogging that may occur in the application and accumulation that may occur during aspiration thanks to its special distal design. Irrigation (lavage, irrigation) of the medication provides aspiration without disconnecting the application system.

SILICONE FEEDING CATHETER

Made of silicone. Allows radiological contrast. It contains an air- and water-resistant cap and a connector compatible with lines and syringes. The anti-clog system prevents clogging that may occur in the application and accumulation that may occur during aspiration thanks to its special distal design. Irrigation (lavage, irrigation) of the medication provides aspiration without disconnecting the application system.

CLOSED ASPIRATION CATHETER

It has two types of methods when performing the aspiration process. One is open and one is closed. Both methods can be used without any problems in the aspiration process. One of two different catheters is used according to the method used. But a closed system aspiration catheter is more useful than an open system aspiration application. It is a less risky product, especially in terms of infection risk.

TPN BAG WITH LIGHT PROTECTION

If the patient cannot be fed orally or enterally, they may need to be fed intravenously. For example, if the patient has been unable to eat orally for several days or is losing weight rapidly, the necessary nutrients are administered intravenously. Total parenteral nutrition is used for this. It also has a feeding solution to feed the patient. A TPN bag is used to use the solution effectively. TPN bag prices vary in the market according to features and volumes.

CATHETER MOUNT

Catheter mount is used for patients using a ventilator. Thanks to this product, patients using tracheostomy cannula or endotracheal tube can move more easily. It also facilitates patient care.

BACTERIA FILTER

The bacteria filter is an important product in patient care. It is used to prevent bacteria from accessing the patient's respiratory tract. It can also be used to keep suction devices sterile. In this way, the risk of infection is reduced.

HMEF FILTER

Patients who receive a tracheostomy cannula or an endotracheal tube do not breathe air through the nose. When using a tracheostomy cannula or an endotracheal tube, air to the airways must be filtered. For this, HME filter is used. In this way, the air is moistened, heated, cleaned and it has no risk in the respiratory tract. The price of HME filter in the market varies according to the brand.

TRACHEOSTOMY FILTER

Tracheostomy is one of the oldest surgical operations. When the airways are blocked for various reasons, a hole is made in the neck and a tube is inserted to reach the trachea. This operation is called tracheostomy. The tracheostomy filter acts as a filter to prevent viruses. Tracheostomy filter prices vary according to the quality of the product in the market.

PORT NEEDLE

It is a port needle used in chemotherapy applications. Huber needles are indicated for the administration of fluids and drugs as well as blood transfusion through blood sampling and an implantable access port. Huber needles can be used for medium to long term infusion for up to 7 days in the absence of infection, redness, swelling or pain and in accordance with local country or professional guidelines.

NASAL PRONG-KIT

Non-invasive ventilation system accessory for neonatology. Very soft, flexible prong. Self-sealing mask. Padded non-adhesive silicone gel pad for placement directly on the forehead. Flexible headband as an alternative to traditional bonnets.

HIGH FLOW CANNULA

The high-flow nasal cannula (HFNC) is an accessory of the high-flow oxygen therapy (HFOT) device. It provides high flow of oxygen to the patient by providing CO₂ excretion in the upper airway.

UMBILICAL CLAMP

The umbilical cord clamp is used to clamp the umbilical cord ligament at birth. It is an important material for cutting the umbilical cord when separating the baby from the placenta. An umbilical clamp (umbilical cord clamp / umbilical clamp) is a medical product usually made of plastic. It is 5 cm long on average.

OXYGEN MASK

The oxygen mask is worn on the face, covering the mouth and nose, and is used to deliver oxygen to the patient. Made of soft material to avoid damaging the skin. Thanks to its design, it fits comfortably on the face.

NEBULIZER MASK

The nebulized bronchodilator offers an ideal use for steroid and antibiotic type drugs. The nebulizer mask used in conjunction with the nebulizer device is made of medical grade PVC material. The connection hose section of the product, which has a connector in standard sizes, has a hardness resistant to breakage and bending. Since the drug reservoir can minimize drug loss, it offers an ideal drug transfer to the patient. The nebulizer mask, which can also transfer enough medication with existing compressors, is compatible with all compressors.

AEROCHAMBER

Low-pressure design provides continuous gentle vacuum and minimizes tissue trauma. Volume markings allow for easy measurement. Designed with flat underside for easy placement on surfaces. Hanging hook and bedside clip for secure attachment.

COTTON

Hydrophilic cotton rolls are used for personal hygiene in hospitals and polyclinics and in everyday life. Hydrophilic cotton rolls are highly absorbent and water-repellent. Absorbency manifests itself within 5 seconds.

BLOOD TRANSFUSION SET

It is a disposable blood donation set. The infusion pump is suitable for use. Sterile, non-toxic, non-progenic. DEHP-free. Sterility of undamaged packages is guaranteed. Do not use the product if the protective cover is broken or missing or the packaging is damaged. 180-200 μm filtered. It is 230 cm long. 20 drops are 1 ml. ($1 \pm 0,1$)

T DRAIN

It is a latex, wound drainage tube with a T-shaped tip that is inserted into the choledochal duct to prevent stenosis in the place of primary repair after surgery or after repair in choledochal trauma. It is made of 100% soft latex. It is compatible with human health. Soft and smooth to minimize soft tissue injury and trauma. Soft and anti-curl structure prevents kinking, blockage and curling. Available in different sizes. 12FR, 14FR, 16FR, 18FR, 20FR, 22FR, 24FR

PENROSE DRAIN

These are thin tubes used to drain fluids such as blood, pus, etc. that may accumulate in closed body cavities after surgeries. It is especially used to drain small amounts of fluids. It is made of 100% soft latex. It is compatible with human health. Soft and smooth to minimize soft tissue injury and trauma. Soft and anti-curl structure prevents kinking, blockage and curling. Available in different sizes.

1/2, 1/4, 3/4, 3/8, 5/8

LEUKOCYTES FILTER

It is used to reduce the leukocyte count in erythrocyte and whole blood suspensions. This product is indicated for the manual collection of a single unit or 5-6 units of platelets in an erythrocyte suspension or for the removal of one unit of leukocytes by collecting platelets with a hospital machine. Provides one unit of erythrocyte suspension at bedside.

High efficiency leukocyte filtration (filtration performance $<2 \times 10^5$) The filter body is transparent, which helps to monitor filter filling and blood flow.

. The filter material is non-woven polyester with excellent wetting properties and a high degree of biocompatibility

SKIN STAPLER REMOVER

Skin staples allow staples to be easily separated from the body. It is a great comfort to the user thanks to its ergonomics.

Skin stapler is a product used to bring the edges of the skin together. Skin stapler remover is used to easily remove the staples applied to the body with skin staples. These procedures do not harm the skin. Easy to use thanks to its design.

SKIN STAPLER

Stainless steel 35 wide (w) staples. Single sterile blister pack.

Easy firing and no snagging thanks to its high quality.

Used for tissue or skin closure. Saves a lot of time especially in surgical operations.

TROCAR

5 mm, 10/11 mm and 12 mm trocars.

Disposable.

With blades and protection.

Button and self-winding

Universal adapter.

Detachable adapter and valves.

Transparent and grooved cannula.

The trocar is used to create a hole when it is necessary to insert a surgical instrument into the patient's body. In other words, it provides an entry point for applying instruments into the body. This tool is disposable. After it has been applied to a patient, it is carefully removed and discarded. When the operation is finished, small stitches are placed on the body.

**ENDOBAG**

Disposable.

5 mm and 10 mm in diameter.

It has an introducer, can be opened automatically and is released if desired.

Various bag sizes available.

It is used to remove the substance from the body during laparoscopic surgeries.

**FLAT DRAIN**

It is made of 100% Medical Compatible Silicone. It is compatible with human health. It has a radiopaque line. Soft and smooth to minimize soft tissue injury and trauma. Soft and anti-curl structure prevents kinking, blockage and curling.

Available in different sizes. It is offered to the end user in sterile packages.

5 mm, 7 mm, 10 mm, 13 mm

**BOMB RESERVOIR**

Made of 100% Medical Compatible Silicone. It is compatible with human health. Available in different sizes. It is offered to the end user in sterile packages. Low-pressure design provides continuous gentle vacuum and minimizes tissue trauma. Volume markings allow for easy measurement. Designed with flat underside for easy placement on surfaces. Hanging hook and bedside clip for secure attachment.

100 cc, 200 cc, 400 cc

**JACKSON PRATT**

It consists of a flat drain and a bomb reservoir. It has silicone structure. It is used for wound drainage. Different sizes are available.

**SOFT DRAIN:**

Non-traumatizing, rounded drain with open distal end and crossed four lateral holes 100 cm. Polyvinyl chloride (PVC) drainage bag

2.500 ml capacity

Millilitre scale

Valve to prevent back escape and contamination

Drain tap

Suspension

VAGINAL SPECULUM

Disposable. Available in Sterile if desired. It has a smooth and sliding surface. It has no sharp edges. Available with screw and standard models.

Vaginal speculum is a product used to examine the vagina or vaginal walls. It helps gynecologists open the vaginal wall. In this way, the doctor controls the vagina comfortably.

**SMEAR BRUSH**

It is designed to collect flaked cervical cells. Collected cells can be processed with normal or liquid-based cell science. (LBC) Contains soft, flexible, elliptical and dense bristles to collect as many cells as possible. Total length: It is around 20 cm. It has pine-tipped and mascara-tipped varieties.

**ANTI-EMBOLISM STOCKING**

It is suitable for blood flow regulating and prophylactic treatment of inpatients before and after embolic surgery and especially for patients who are subjected to post-traumatic treatment and are subjected to hydrostatic edema, contusions and sprains. 18-24mm Hg at the ankle level, gradually decreasing towards the calf and thigh, the venous system (venous pump) corrects the internal compression disorder. It allows the blood circulation rate in the femoral veins to return to normal.

Small, Medium, Large, X-Large, XX-Large, XXX-Large

**STERILIZATION ROLL**

Provides maximum safety. All prints are placed outside the packaging area to avoid the risk of pigment migration into the product. Reinforced film to eliminate the risk of tearing when opening. 60 gsm or 70 gsm medical kraft paper with superior barrier properties and quality. Non-toxic, water-based definitive process indicators. Formaldehyde indicator can also be applied if desired. Strong edge welding and visible adhesion channels. It is clearly opened, particle does not break from paper, it has an opening direction. Conforms TO EN 868-5 standard. 5 cm-40 cm x 200 m

**WRAP PAPER**

It complies with all international standards. It is permeable and creates a bacterial barrier. It is made of pure cellulose without additives and is in Green, blue and white colors.

Wrap paper is used to pack hospital laundry. It is also used to sterilize medical instruments.

Dimensions: 100x100cm, 120x120cm, 130x150cm

CAP

Disposable. Sanitary. Anti-allergic. Air permeable (easy breathing). It provides the isolation of the hair area.

Cap is a disposable hygiene product. Cap is used in many areas such as medicine, dentistry, veterinary, laboratory, cosmetics.

**STOPPER**

For additional dose applications.

Injection port. Latex-free.

Prevents contamination.

Filling volume 0.088 cc.

Hygienic use.

Male luer lock connection.

White stopper and heparin stopper options are available.

**ENEMA SET****ABESLANG**

Made of 1st grade birch wood Smooth and even surface Homogeneous in packs of 100.

Available in sterile and non-sterile Abeslang is a wooden stick that doctors press against the tongue to examine a patient's throat or tonsils. Also known as a tongue depressor or tongue stick. It has a standard length.

Abeslang stick / abeslang stick; In addition to its use for treatment and examination, it is effectively used in many different areas.

**LANCET**

It is a single-use sterile piercing with a pointed needle-shaped tip when it is necessary to take a blood sample for glucose measurement. Made of carbon steel. Suitable for almost all lancet devices.

LANCET PEN

It is used with existing launches.

The lancet used is discarded and the pen is continued to be used. Needle can be adjusted gradually. Easy and safe to install.

TRIFLO

It is used in the treatment of respiratory diseases such as bronchitis or asthma and after surgeries that affect breathing. The aim of the device is to increase lung capacity and reduce shortness of breath in people with respiratory problems. Respiratory muscles are also strengthened thanks to the exercises performed with this device. Respiratory exercise device consists of parts including airway filter, airway hose, mouthpiece. Mouthpiece suitable for mouth anatomy. It has three balls. Available in single package.

**TOURNIQUET**

It is applied on single bones. (Applied to the biceps on the arm and thigh bone on the leg) Tourniquets should be applied for serious life-threatening bleeding that cannot be prevented by any other method. A tourniquet is only necessary when a large blood vessel (artery) is cut. The tourniquet should be placed slightly above the wound, just above the joint and not touching the wound.

**OTOSCOPE END**

These tips are produced in accordance with different otoscope brands used in the hospital and can be used for single use in each examination. Produced from re-sterilizable material.
1 number 2 mm 2 number 3 mm

**URINE BOTTLE**

It is used to meet the toilet needs of patients. The patient urine bottle is plastic and covered. It can be washed. It is generally useful for patients who cannot get out of bed. Suitable for men and women.

RENAL BATHTUB

Used for dressing waste.
Disposable.
Black and white color options.
Kidney tubs are mostly used for dressing wastes in health institutions. It is also used for different purposes such as injection container, vomiting container. Saves time for healthcare professionals.
It is very economical and hygienic. It is very economical and hygienic.

**BEDPAN**

The high-quality plastic bed pan (bed pan) is made of transparent rubber. It is easy to use because it is lightweight.
Healthy people can easily manage their bowel movements. However, when people who are bedridden due to health problems cannot meet this task themselves, some tools are used. One of these is a bedpan. A bedpan is used for the patient to defecate and urinate. It is made of rubber

MEDICAL WASTE BUCKET

Used for medical waste. High-quality plastic material. Lockable lid. 1,2 lt, 2 lt, 3 lt, 5 lt, 10 lt, 30 lt
 Waste bin for medical waste including cutting and piercing materials. It is durable because it is made of first class material. Medical waste bucket is used to avoid problems with infected waste. It also has a lid that prevents the odours of the waste from leaking. Thanks to its design, the lid opens easily. For different uses, it has 6 different volume varieties.

**MEDICINE GLASS**

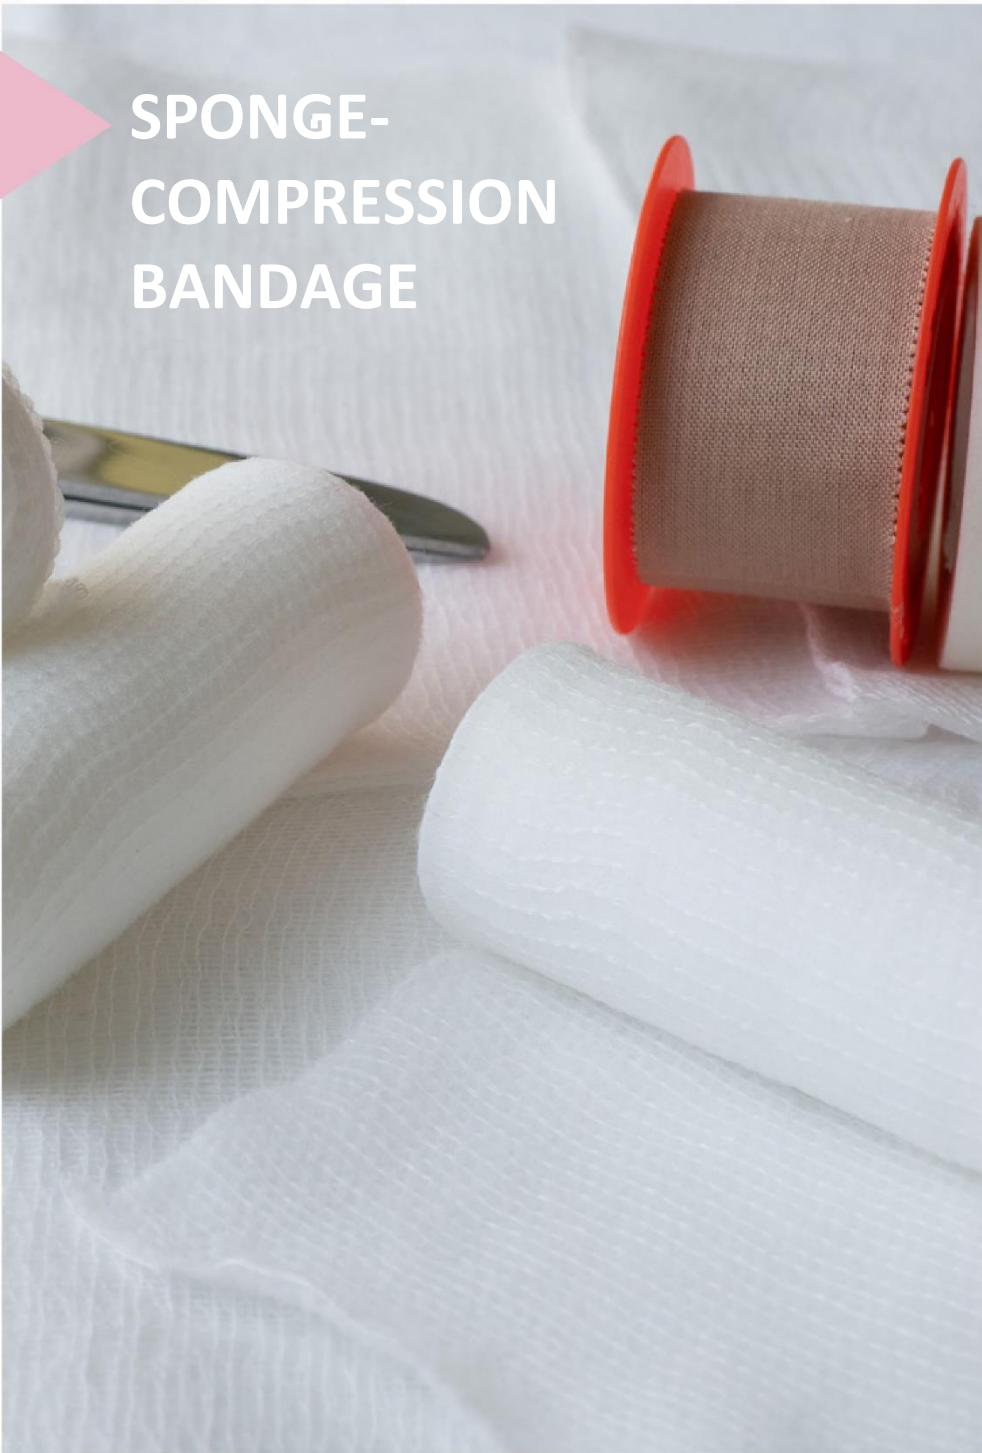

Produced for the identification and storage of medicines used daily. Made from solid plastic. There is also a lid for the medicine glass.

NEEDLE TIP

Pink, black, green, yellow, round, brown.
 Suitable for use with injector.
 Produced from high-quality stainless steel.

SPONGE- COMPRESSION BANDAGE

ELASTIC COMPRESSION BANDAGE

Hydrophilic cotton rolls are used for personal hygiene in hospitals and polyclinics and in everyday life. Hydrophilic cotton rolls are highly absorbent and water-repellent. Absorbency manifests itself within 5 seconds.

DRESSING DRAPE SET

Product	Measurement	Quantity
Perforated Adhesive Tape Drape	60*60cm	1
Solution container	250CC	1
Sponge with Handle		1
Universal Bag	30*35cm	1
Sponge	7.5*7.5cm	5
Surgical Glove	LARGE	1 pair
Wipes	40*40cm	1
Sterilization Pack	50*50cm	1

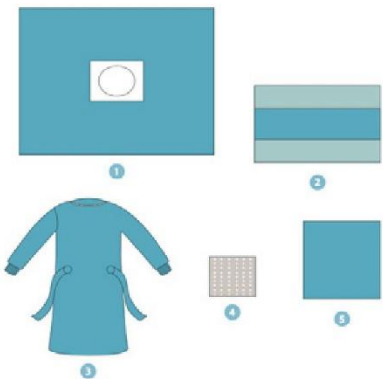

CERRA

LAPAROSCOPY DRAPE SET

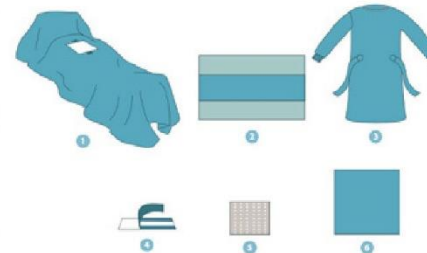

Product	Measurement	Quantity
Laparoscopy Drape	200*300cm	1
Tool Table drape	150*200cm	1
Mayo Table	80*150cm	1
Standard Surgical Apron	LARGE	2
Op-tape	10*50cm	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

MINOR DRAPE SET

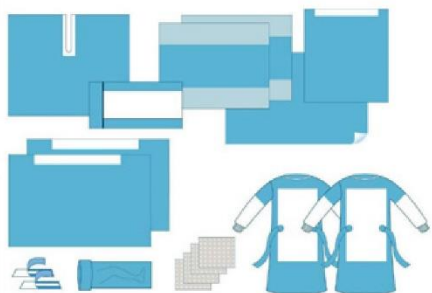

Product	Measurement	Quantity
Minor Perforated Drape	75*75cm	1
Tool Table drape	50*50cm	1
Standard Surgical Apron	LARGE	1
Wipes	40*40cm	1
Sterilization Pack	50*50cm	1

LAPAROTOMY DRAPE SET

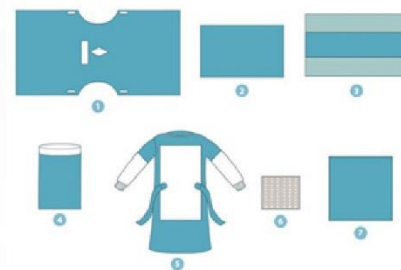

Product	Measurement	Quantity
Laparotomy Drape	200*300cm	1
Tool Table drape	100*150cm	1
Standard Surgical Apron	LARGE	2
Op-tape	10*30cm	2
Wipes	40*40cm	2
Sterilization Pack	75*75cm	1

ABDOMINAL DRAPE SET

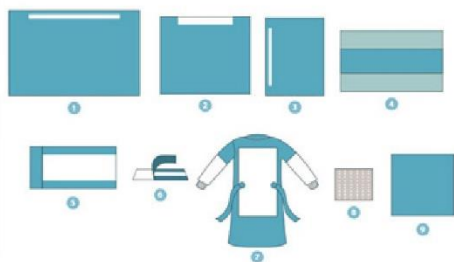

Product	Measurement	Quantity
Abdominal Drape	200*300cm	1
Tool Table drape	100*150cm	1
Tool Table drape	150*200cm	1
Mayo Table	80*150cm	1
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

CYSTOSCOPY DRAPE SET

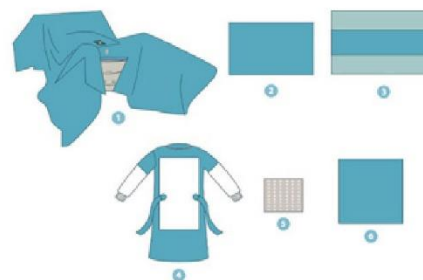

Product	Measurement	Quantity
Cystoscopy Drape	75*100cm	1
Drape	100*120cm	1
Tool Table drape	100*150cm	1
Leg Case	60*115cm	2
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

GENERAL SURGICAL DRAPE SET

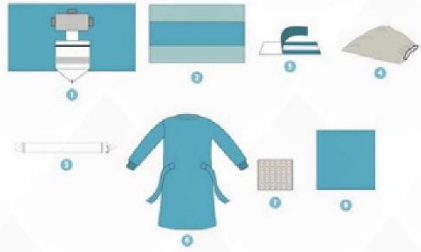

Product	Measurement	Quantity
Anesthesia Drape	150*240cm	1
Leg Drape	150*180cm	1
Adhesive Tape Drape	75*100cm	2
Tool Table drape	100*150cm	1
Mayo Table	80*150cm	1
Op-tape	10*30cm	2
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

T.U.R. DRAPE SET

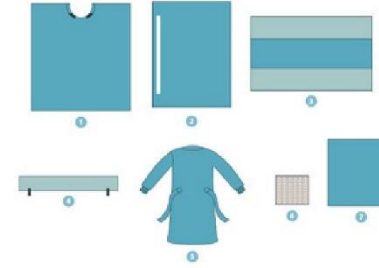

Product	Measurement	Quantity
T.U.R. Drape	200*400cm	1
Drape	100*120cm	1
Tool Table drape	150*200cm	1
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

PERCUTANEOUS DRAPE SET

Product	Measurement	Quantity
Percutaneous Drape	150*300cm	1
Tool Table drape	100*150cm	1
Op-tape	10*50cm	1
Scope Case	50*80cm	1
Camera Case	13*150cm	1
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	1
Sterilization Pack	100*100cm	1

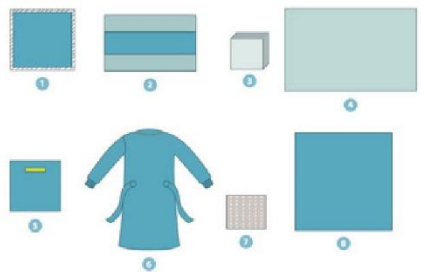

DENTAL DRAPE SET

Product	Measurement	Quantity
Mouth-Hole Patient Drape	150*150cm	1
Adhesive Tape Drape	150*150cm	1
Tool Table drape	100*150cm	1
Transparent Hose Case	8*200cm	3
Standard Surgical Apron	LARGE	1
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

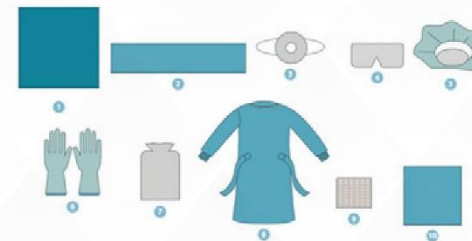

DENTAL ONCOLOGY

IMPLANT DRAPE SET

Product	Measurement	Quantity
Table Drape	50*50cm	1
Tool Table drape	50*50cm	1
Sponge	7.5*7.5cm	10
Transparent Drape	10*120cm	2
Reflector Drape	15*15cm	2
Standard Surgical Apron	LARGE	1
Wipes	40*40cm	1
Sterilization Pack	50*50cm	1

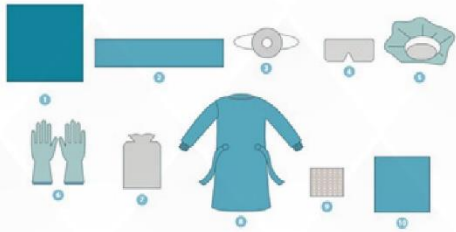

CHEMOTHERAPY DRAPE SET

Product	Measurement	Quantity
Chemotherapy Drape	75*75cm	1
Working Base	40*120cm	1
Mask		1
Protective goggles		1

Chemotherapy Gloves		1 Pair
Waste bag		1
Standard Surgical Apron	LARGE	1
Wipes	40*40cm	1
Sterilization Pack	100*100cm	1

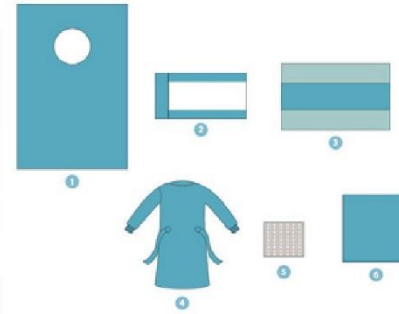

RADIOLOGY

CHEMOTHERAPY DRAPE SET

Product	Measurement	Quantity
Anesthesia Drape	150*300cm	1
Tool Table drape	100*150cm	1
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	75*75cm	1

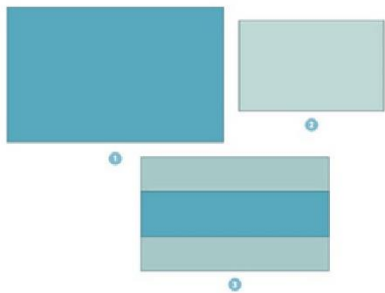

RHINOPILASTY DRAPE SET

Product	Measurement	Quantity
Rhinoplasty Drape	150*250cm	1
Mayo Table	80*150cm	1
Tool Table drape	75*100cm	2
Standard Surgical Apron	LARGE	1
Wipes	40*40cm	1
Sterilization Pack	50*50cm	1

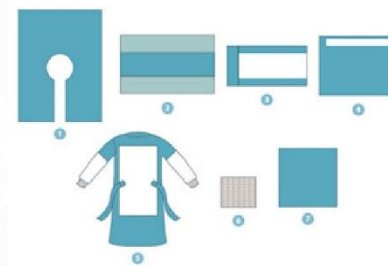

AESTHETIC SURGERY BRAIN SURGERY

HAIR TRANSPLANTATION DRAPE SET

Product	Measurement	Quantity
Drape	150*150cm	2
Transparent Drape	30*30cm	1
Tool Table drape	100*150cm	2

SHUNT DRAPE SET

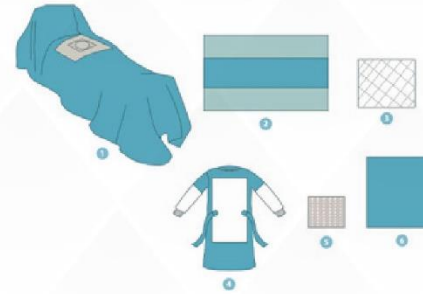

Product	Measurement	Quantity
Shunt Drape	150*300cm	1
Tool Table drape	150*200cm	1
Mayo Table	80*150cm	1
Side Tape Drape	100*120cm	2
Reinforced Apron	LARGE	1
Wipes	40*40cm	2
Sterilization Pack	100*100cm	2

CRANIOTOMY DRAPE SET

Product	Measurement	Quantity
Craniotomy Drape	200*300cm	1
Mayo Table	80*150cm	1
Op-tape	10*50cm	1
Side Tape Drape	50*35cm	4
Mayo Table	150*200cm	1
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

CAESAREAN DRAPE SET

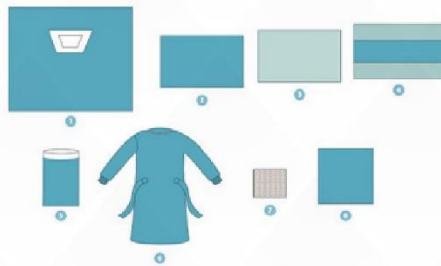

UROLOGY

Product	Measurement	Quantity
Caesarean Drape	200*300cm	1
Tool Table drape	100*150cm	1
Baby Drape	75*75cm	1
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

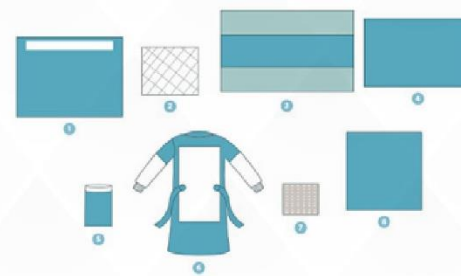

GYNAECOLOGY

HAIR TRANSPLANTATION DRAPE SET

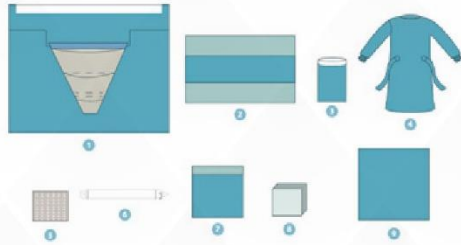

Product	Measurement	Quantity
O.P.U. Drape	75*100cm	1
Transparent Drape	60*60cm	1
Tool Table drape	100*150cm	1
Leg Case	60*115cm	1
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

BIRTH DRAPE SET

Product	Measurement	Quantity
Side Drape with Tape	75*150cm	1
Baby Drape	75*75cm	1
Tool Table drape	100*150cm	1
Drape	75*100cm	1
Leg Case	40*60cm	2
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

I.V.F. (IVF) DRAPE SET

Product	Measurement	Quantity
I.V.F. Drape	150*225cm	1
Tool Table drape	100*150cm	1
Leg Case	40*60cm	2
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	2
Camera Case	13*250cm	1
Universal Bag	50*60cm	1
Sponge	7.5*7.5cm	10
Sterilization Pack	100*100cm	1

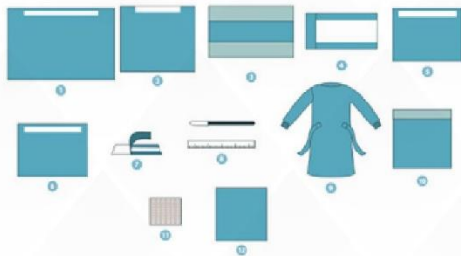

SHOULDER DRAPE SET

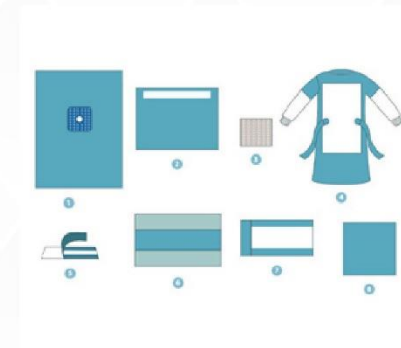

Product	Measurement	Quantity
Shoulder Drape	200*300cm	1
Side Tape Drape	75*150cm	3
Op-Tape	15*50cm	2
Standard Surgical Apron	LARGE	2
Wipes	40*40cm	2
Tool Table drape	100*150cm	1
Mayo Table	80*150cm	1
Sterilization Pack	100*100cm	1

ORTHOPAEDICS

VERTEBRAL DRAPE SET KNEE DRAPE SET

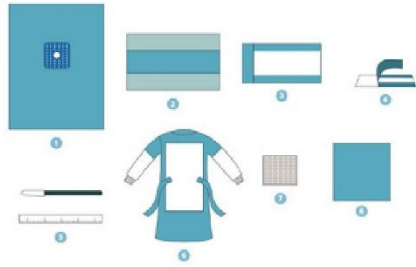

Product	Measurement	Quantity
Anesthesia Drape	150*200cm	1
Leg Drape	150*180cm	1
Tool Table drape	150*200cm	1
Mayo Table	80*150cm	1
Tape Drape	100*120cm	2
Tape Drape	75*100cm	2
Op-tape	10*30cm	2
Skin Pen and Ruler		1
Standard Surgical Apron	LARGE	2
Universal Bag	50*60cm	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

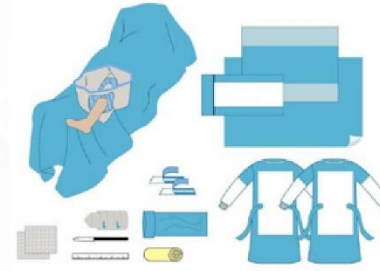

Product	Measurement	Quantity
Extremity Drape	200*300cm	1
Side Tape Drape	75*80cm	2
Wipes	40*40cm	2
Reinforced Surgical Apron	LARGE	2
Op-Tape	10*50cm	1
Tool Table drape	100*150cm	1
Mayo Table	80*150cm	1
Sterilization Pack	100*100cm	1

EXTREMITY DRAPE SET

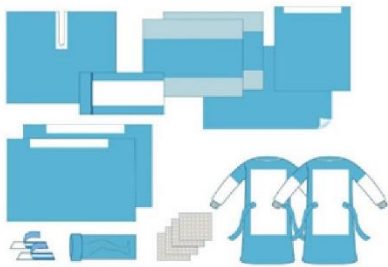

Product	Measurement	Quantity
Extremity Drape	200*300cm	1
Tool Table drape	150*200cm	1
Mayo Table	80*150cm	1
Op-Tape	10*30cm	2
Skin Pen and Ruler	Standard	1
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1

ARTHROSCOPY DRAPE SET

Product	Measurement	Quantity
Arthroscopy Drape with Pouch	200 '300 cm	1
Tool Table drape	150*200cm	1
Stoichinet	40*75cm	1
Camera Case	13*250cm	1
Skin Pen and Ruler	Standard	1
Elastic bandage	10*150cm	1
Op-tape	10*50cm	2
Reinforced Surgical Apron	LARGE	2
Wipes	40*40cm	2

ARTHROPLASTY (HIP) DRAPE SET

Product	Measurement	Quantity
Hip U Drape	150*200cm	1
Hip Drape	150*300cm	1
Tape Leg Drape	150*180cm	1
Reinforced Surgical Apron	Large	2
Tool Table drape	100*150cm	1
Mayo Table	80*150cm	1
Wipes	40*40cm	2
Sterilization Pack	100*100cm	1
Wipes	40*40cm	2
